

You can turn on your TV

whole slew of other companies

- **Datacenter Virtualization.** Nearly every company today is looking to VMware for Datacenter virtualization to cut down on the cost of hardware and provide an easier way to manage their current infrastructure. The Tek has years of experience working with large and small companies assisting them with datacenter virtualization. Call The Tek today and find out how datacenter virtualization can work for your company.

- **Microsoft 365.** Not every company needs an in-house Exchange and Sharepoint deployment. Microsoft is now offering a new service called Microsoft 365 which offers hosted Exchange, Sharepoint and even Microsoft's live communication server renamed Lync which offers corporate instant messaging, video conferencing and online meetings. The Tek is currently in the Beta and will be offering this service for your company soon!

- **Amazon EC2 And Cloud Computing Consulting.** If you are a small to mid-sized business there is probably no reason you need to have any servers located in your company's office. With Amazon EC2 and other cloud computing companies you can move your servers to a cloud computing company such as Amazon which will offer full redundancy of your server virtual images. This way your company doesn't have to worry about hardware failures or even day to day backups. Call The Tek and see how moving to the cloud can reduce your IT costs and headaches.
